The Great Barrier Reef is the world's largest reef system composed of over 2900 individual reefs and 900 islands stretching for over 2,300 kms. The reef is located in the coral sea, off the coast of Queensland, Australia. It can be seen from outer space and is the world's biggest single structure made by living organisms. This reef structure is composed of and built by billions of tiny organisms, known selected as a World Heritage Site in 1981. CNN labelled it one of the seven natural wonders of the world. The Queensland National Trust named it a stale icon of Queensland. The Great Barrier Reef has long been known to and used by the Aboriginal Australian and Torres Strait Islander Peoples, and is an important part of local groups' cultures and spirituality. The reef is a very popular destination for tourists.

Questions :

- What is the Great Barrier Reef ?
